Slab Strengthening at Merchant Taylor School, Northwood London, UK

Merchant Taylor School in Northwood London is an independent day school for boy's that was first established in 1561. Borrás were awarded the contract to construct a new two-storey building and work began on site in March 2014.

Fibrwrap UK was employed by Borrás to rectify a lack of reinforcement at eight locations over columns in a slab within the existing building in December 2014. Three layers of carbon fibre fabric was designed and applied by Fibrwrap UK to the top of the slab in both directions at each column location. The works were completed in 8 days.
